

CONTAINER ORCHESTRATION

KUBERNETES®

* * *

WHAT IS KUBERNETES?

in Michele Mastropietro

in Federico Fiordoliva

Kubernetes

Kubernetes®

Google released K8s in 2015 and made a donation to the Cloud Native Computing Foundation (CNCF). Microsoft and Amazon released their version of kubernetes. Written in go.

DOCUMENTATIONS: <https://kubernetes.io/docs/home/>

in Federico Fiordoliva

WHAT DOES IT DO?

Container Orchestration

Workload Placement

Infrastructure Abstraction

Desiderate State

K8S PRINCIPLES

Desiderate State

Controllers

API Servers

API OBJECTS

Pods

Controllers

Services

Storage

How k8s manages my Pods

in Michele Mastropietro

in Federico Fiordoliva

Controllers

Create and manage Pods for you

Define your desired state

ReplicaSet : number of replicas

Deployment : Manage rollout of **ReplicaSet**

Many more...

Services

Add presistency

Networking abstraction for Pod access

IP and DNS name for services

Redeploys Pods automatically with update

Load Balancing

Storage

Persistent Volumes

Dynamic Volumes

CLUSTER COMPONENTS

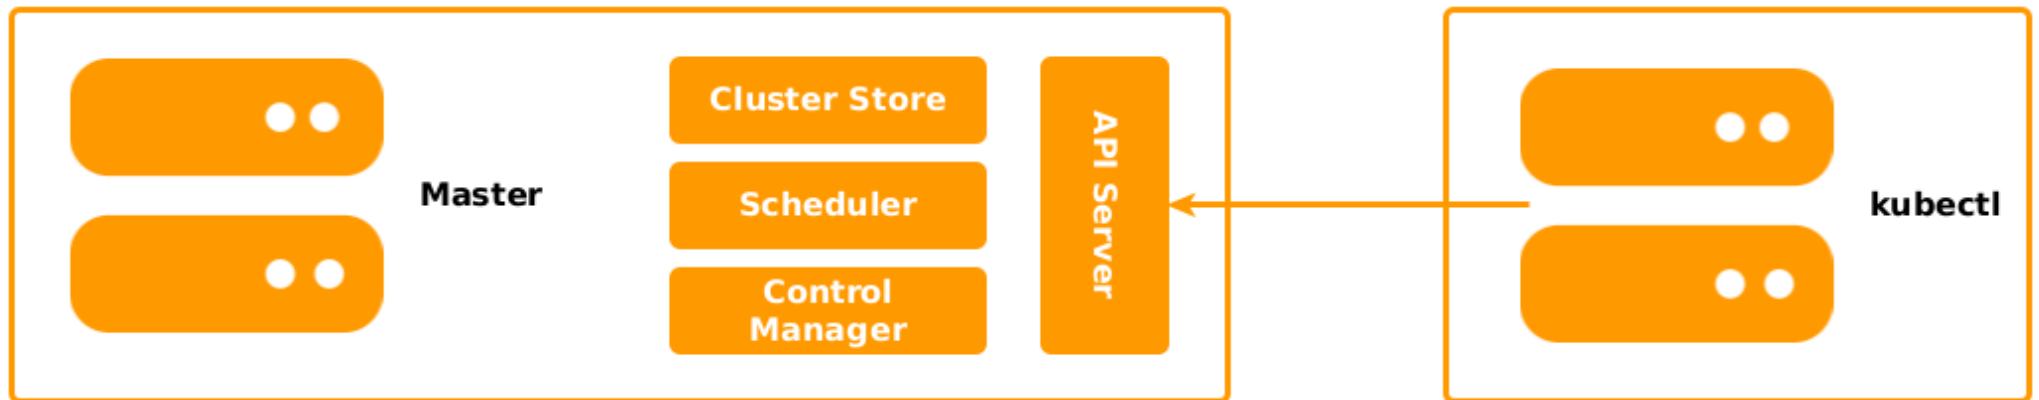

Master Nodes

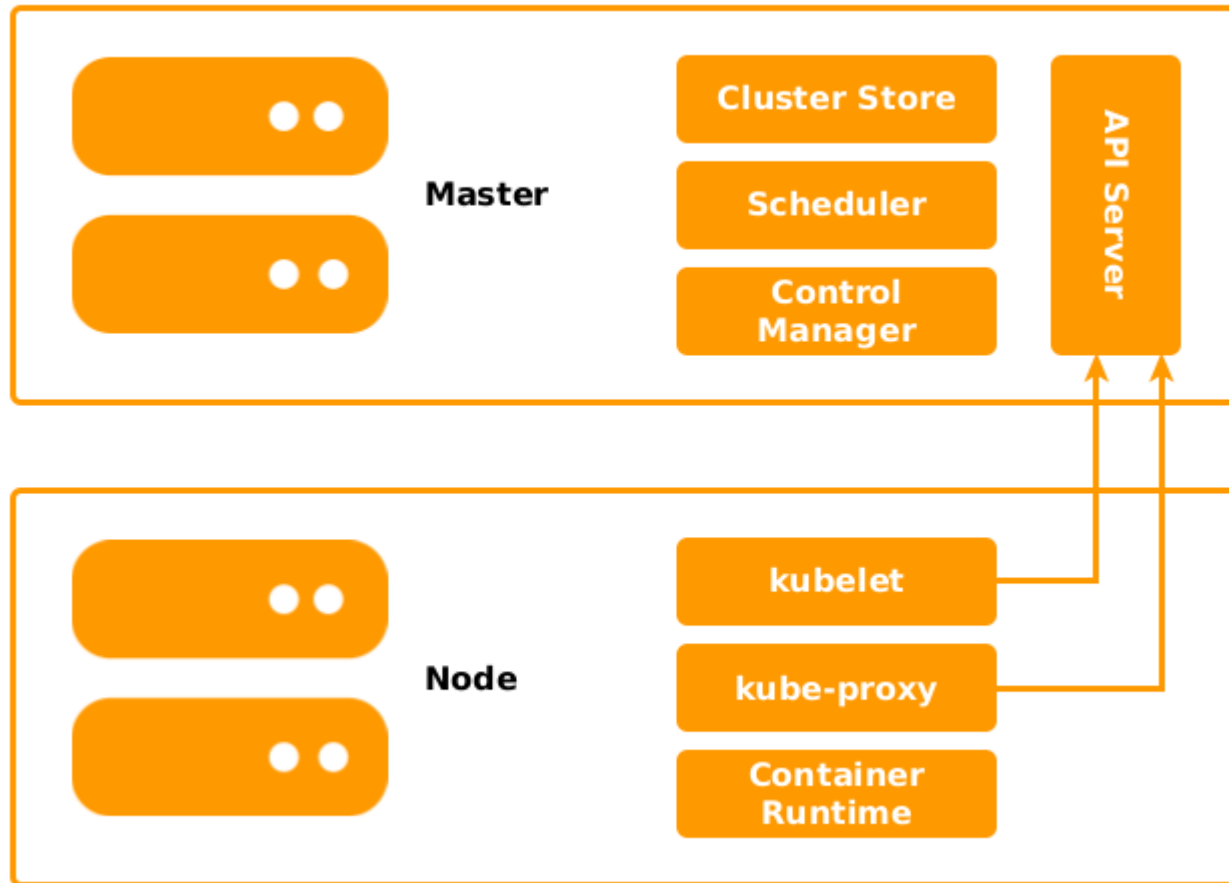

Worker Nodes

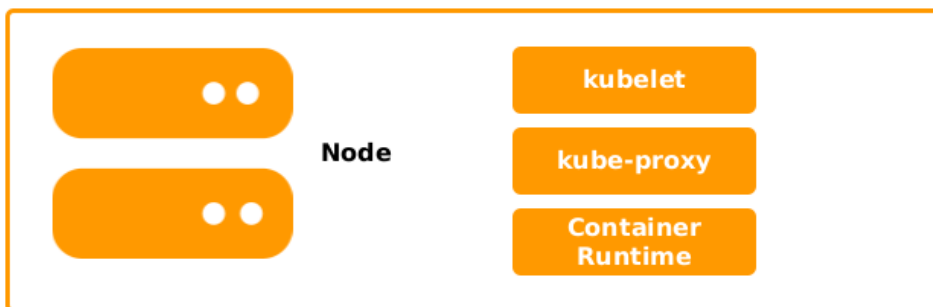

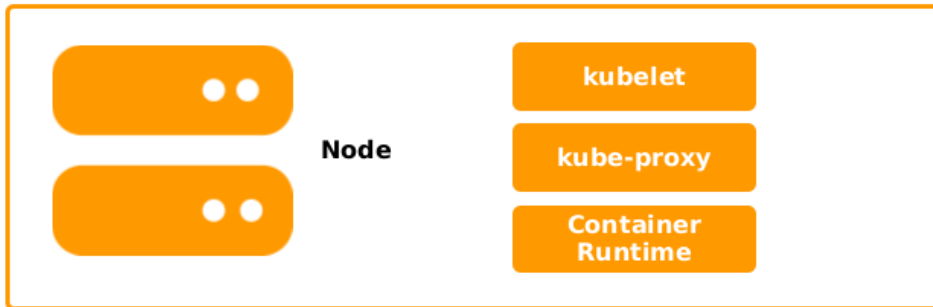

Scheduled/Add Ons

Master - Control Plane Components

Nodes

Pods

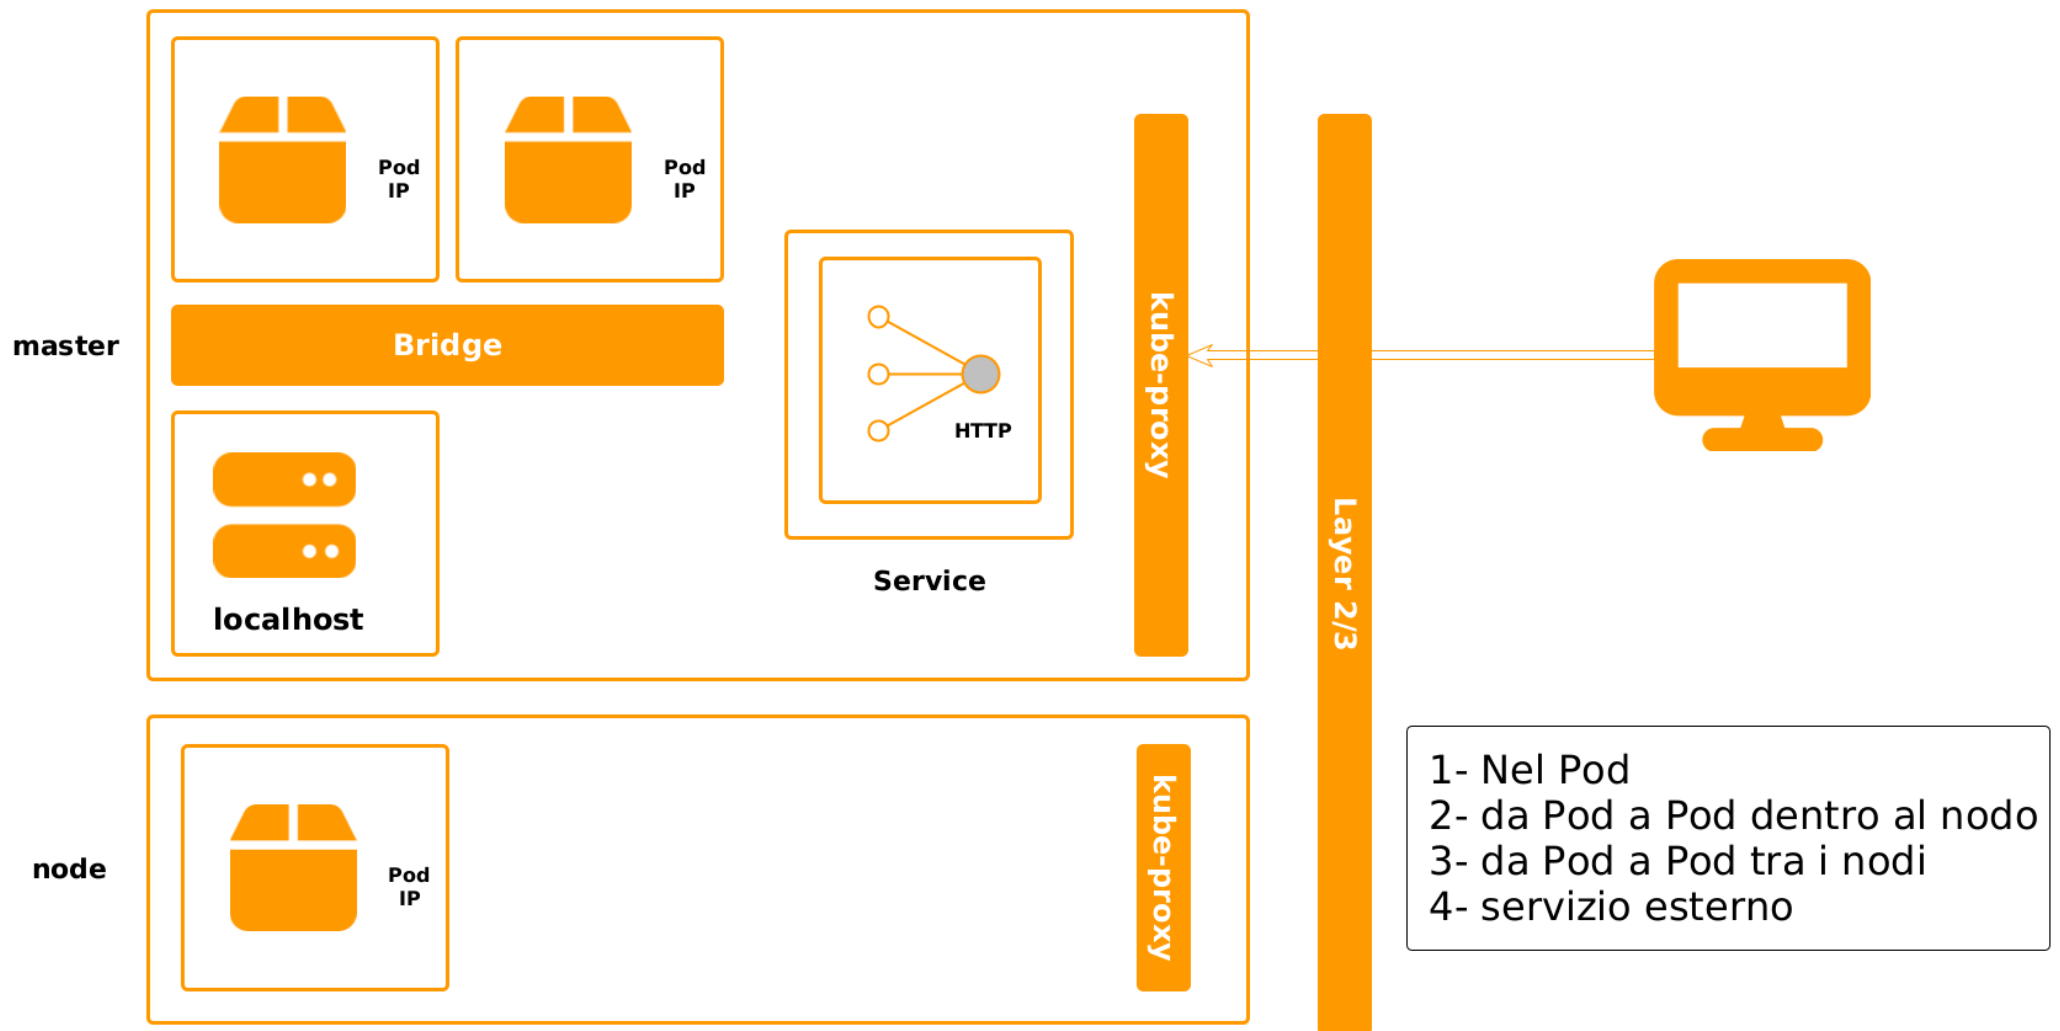

Services

Services

Networking Fundamentals

Networking

Installation

Kubernetes Official

There are some tools for installation

WEB SITE:	kubernetes.io/
------------------	---

INSTALLATION:	kubernetes.io/docs/tasks/tools/
----------------------	---

DOCUMENTATION	kubernetes.io/docs/home/
----------------------	---

RKE2 - Rancher Kubernetes Engine v2

Simplifyng the installations of all components

WEB SITE:	docs.rke2.io/
------------------	---

INSTALLATION:	docs.rke2.io/install/quickstart
----------------------	---

HIGH AVAILABILITY:	docs.rke2.io/install/ha
---------------------------	---

ARCHITECTURE:	docs.rke2.io/architecture
